Beverly Hills Joins 11th Annual Wyland National Mayor's Challenge for Water Conservation

Residents are Encouraged to Make a Pledge to Reduce Their Water Footprint

Beverly Hills, CA (April 6, 2022) – Beverly Hills Mayor Lili Bosse has joined Mayors across the country in asking everyone to make a long-term commitment to manage water resources more wisely by taking part in the 'Wyland National Mayor's Challenge for Water Conservation.'

The Wyland Foundation, a non-profit organization dedicated to promoting, protecting, and preserving the world's oceans, waterways and marine life, created the challenge 11 years ago as an opportunity to reward community members for their positive conservative actions.

Now through April 30, Beverly Hills residents can also show their support by making an online pledge to conserve water for a chance to win prizes at mywaterpledge.com.

Even throughout the COVID-19 pandemic, the City of Beverly Hills has continued to provide important services such as clean and safe drinking water to the community and has upgraded its facilities and systems to preserve and limit its water usage.

Recently, the City of Beverly Hills reopened its Water Treatment Plant. Soon, the reopened plant will provide a local supply of reliable and clean water to residents without adding additional stress to the Metropolitan Water District resources.

To learn more about the City's water conservation visit bhsaves.org.
